

ATD Pressure Gas System presents

The Cardox Chronicle

ATD Pressure Gas System Newsletter

October 2015

New Instructional Wallcharts and Troubleshooting Guides now available from ATD.

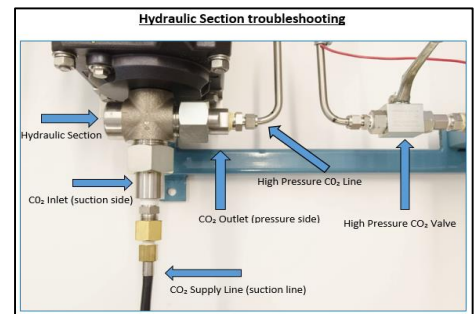

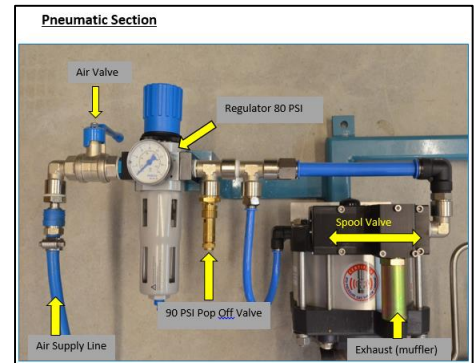

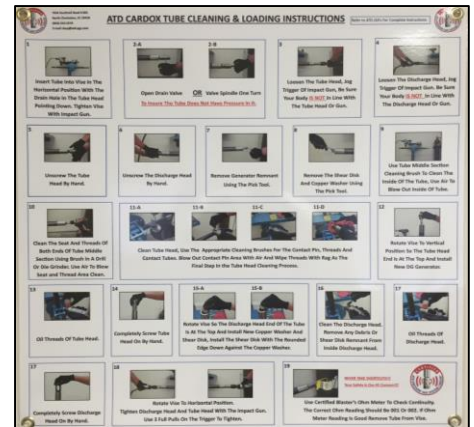

With our continued objective of providing our customers with outstanding service and information, all of us at ATD – Pressure Gas System are pleased to announce that we have new Instructional Wallcharts as well as several new Troubleshooting Guides for your ATD Cardox System.

Our new Instructional Wallcharts include both the complete Cleaning and Loading Procedure and the CO₂ Filling Procedure. These new Wallcharts feature updated safety procedures and include our newest Auto Valve Fill Head as well as our original standard type. Large photos complement our detailed instructions.

In addition to our new Wallcharts, we have Troubleshooting Guides for correcting leaks in Tube Middle Sections, Discharge Heads and Fill Heads.

Have a question about your CO₂ supply cylinder or the operation of your CO₂ liquid transfer pump? We now have a Troubleshooting Guide that provides a step by step instruction for repair and preventive maintenance for your Filling Station.

ATD also provides our complete Cardox Job Safety Analysis. Our comprehensive guide for safety and instructions.

CARDOX

We are your Cardox Specialists; Cardox is all we do!

At Your Service:

Technical Support

Our ATD Cardox Technicians provide assistance on all aspects of the use of your Cardox System; from installation, Safety Training, repairs, maintenance, and specific applications. We are your Cardox Specialists! Cardox is all we do.

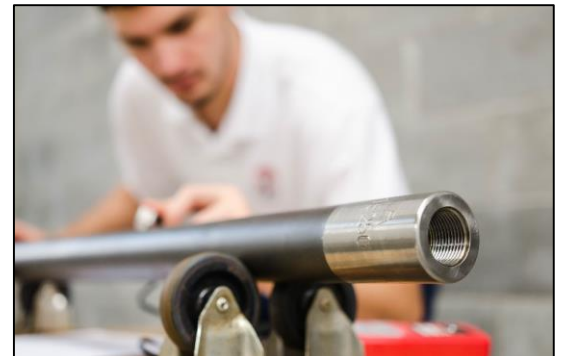

Safety Training

With over 60 years' experience we have built an outstanding international reputation providing comprehensive Safety Training. Our training is site specific for the exact applications at your job site!

Equipment Safety Inspections and Repairs

We provide complete safety inspections on all ATD Pressure Gas Tubes and components. In addition, our factory trained technicians can repair or rebuild your CO₂ Liquid Transfer Pump and Drilling Equipment.

Team ATD-Pressure Gas System USA

We understand how critical your operations are and ATD is committed to supporting your production. We encourage your feedback as we are continuously making changes to fulfill our customer's needs. Please see our contact information below.
