

ATD Pressure Gas System presents

The Cardox Chronicle

ATD Pressure Gas System Newsletter

May 2016

By John Stulack

ATD Pressure Gas System launches new Website

Greetings to all of our valued business partners worldwide! We are proud to announce that we have launched our new website. Please take a moment and visit us at www.atd-pgs.com. When you visit you can enter a chance to win our "ATD Blasting Machine Safety Package Drawing". Just go to our website, then go to our contact page and enter your information and type "ATD Blasting Machine Safety Package Drawing" in the comments section on or before May 31st. Our drawing will be held on Wednesday June 1st.

Our new website is a work in progress, along with ATD essential materials we will soon offer our customers with an Extranet. The ATD Extranet will provide our customers with site specific information on your equipment such as Tube Inspections as well as records on Safety Training.

ATD WILL HAVE AN EXHIBIT AT THE IEEE/PCA CONFERENCE IN DALLAS

ATD will be featuring our new patented Cardox equipment that increases safety while expanding your productivity at this year's IEEE Conference. Please stop by our booth # 208 and say hello and enter a chance to win a Yeti Cooler or Tumbler!

We are honored to be collaborating on a paper at this year's conference with Giant Cement. The paper titled "Preheater Tower Best Safety Practices" is authored by Josh Fredlake of Giant Cement and our own Tom Spaits with ATD.

NEW EQUIPMENT ATD IS FEATURING AT THIS YEARS CONFERENCE

ATD Revolutionized Cardox technology 60 years ago by removing it from the coal mine and adapting it for on line build-up removal for industrial processes. ATD is revolutionizing Cardox once again with new patented technology that increases safety while increasing your productivity. We are your Cardox Specialists; Cardox is all we do!

- **ATD 100% Safety Locking Collar and new improved Base Socket**

Ergonomic Handle

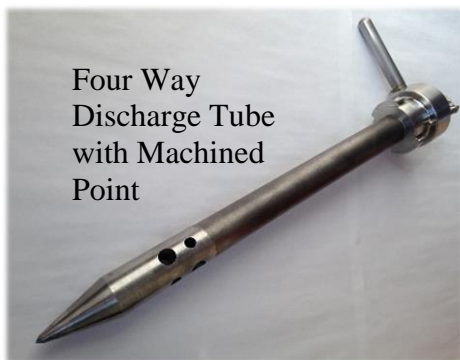

- **Specialized ATD Equipment for Bulk CO₂ Supply Tanks**

Tired of changing 50lbs. CO₂ supply bottles? Use a bulk CO₂ supply tank!

- **ATD Heat Resistant Discharge Tubes**

The Straight Shot with Wedged Tip

Two Way Discharge Tube

- **ATD-Target Blaster**

ATD Discharge Tubes with our 100% Safety Locking Collar have several advantages: The loaded Cardox Tube is *never* exposed to heat – Tube is always inserted at the correct depth insuring no damage to the refractory - Tube cannot launch – Straight shot enables the operator to remove material normally out of reach – Discharge Tubes can be impacted into tough material reducing or eliminating drilling. Available in heat resistant material and all types of Discharge Types: Four Way – Two Way – One Way – Straight Shot
